

THE INCREASE OF THE VOICE FREQUENCY from I to VII

(150 000 Bovis Units up to 1 050 000 Bovis Units)

Through the rise of the voice frequency the voice acquires a very special expression. The voice becomes clear, and the spoken message has a lasting effect on the person. The speaker's tone of voice changes subtly, as well as their skillfulness in choosing words carefully.

With our voice we give our personality the opportunity to communicate with the language. Through the frequency rise, the voice has a much greater importance in our daily lives. The high vibration is in harmony with the divine/intuitive connection between each person and his own heart – in this way, the heart language can more freely flow.

After completion of the Teaching a certificate will be handed over.
